

WASTE

- ❑ AMP 6 success has been driven by targeted intervention, a focus on innovation, and understanding our network – we need to push ourselves further in AMP 7
- ❑ We will be deploying new technology such as fibre optic analytics, bio-augmentation and CSO monitors
- ❑ We will continue to drive outperformance in the things we know we're good at, e.g. sewer flooding whilst creating a bespoke ODI on Public Sewer Flooding.
- ❑ Waste ODIs will continue to have the most potential reward.

Financial ODIs discussed...

Enhanced

Pollution incidents

Internal sewer flooding

Sewer collapses

Public sewer flooding

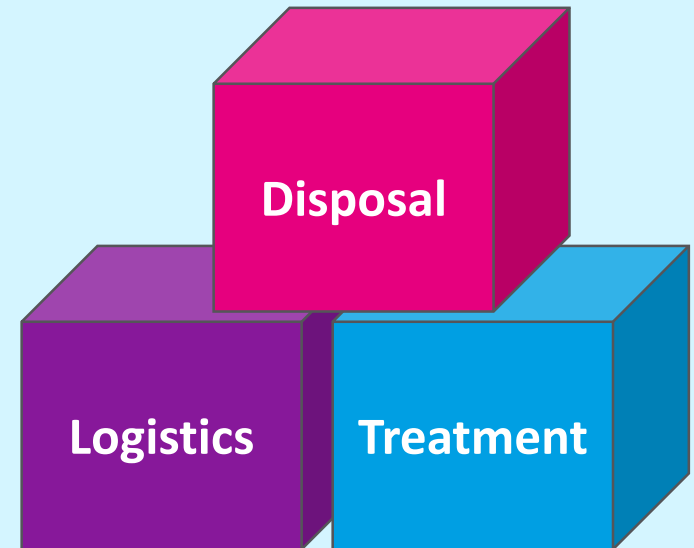

Sewer blockages

External sewer flooding

Bioresources

We're already the best

But we can do more by being #1 in every part of the process

AMP 6 ODI Uncapping

If uncapped, we would be able to accelerate spend in waste to hit AMP 7 at an even better rate.
